

INDEX TO ARTICLES IN *CONTREBIS*: SUBJECTS AND PLACES

Contrebis is the journal of Lancaster Archaeological and Historical Society. This index – from Volume 1 in 1973 – lists alphabetically the subjects and locations of all the articles (that is, excluding editorials, book reviews, excursion reports, newsletter items and obituaries). It shows their volume number, year of publication and the surname of the first-named or sole author. So, the entry ‘Lancaster Pottery v1(1) 1973 Price’ shows that an article on the Lancaster Pottery by Price was published in Volume 1 Part 1 in 1973. This article is listed under both ‘Pottery’ and ‘Lancaster’. An article that deals with more than one subject and/or place has been indexed under each one. A subject heading may link to more than one article. Occasionally, an author will have had more than one article in the same volume on a similar topic: the reference is given twice to indicate that there are two separate papers. The subjects are specific rather than general. This index supersedes the printed index published for Volumes 1 to 28. This index will be updated periodically on the *Contrebis* section of the Society’s website – <http://lahs.archaeologyuk.org> – where copies of all except the most recent articles can be found. Please notify the Editor of any amendments.
